

GVT 103/GVK Rooflights for Uninhabited Spaces

An ideal solution for bringing light into uninhabited/cold spaces. The side-hung GVT 103/GVK rooflights can be installed in all roof pitches between 20° and 65° in flat or profiled roofing materials up to 60mm in profile. The sash can be opened and secured to 90° when used for emergency escape.

Features

- ONLY suitable for uninhabited/non insulated roof spaces
- Rooflights finished in black and manufactured from polyurethane frames with an anodised aluminium sash
- Operated with a handle with three ventilation positions
- No background ventilation provided when the windows are closed
- GVT 103 – U-value: 3.1
- GVK – U-value: 5.1
- No glazing bars
- No Accessories available

Operation

The window is opened by turning the handle and pushing the sash outwards. The sash can be positioned and secured in three positions. If the sash is opened 90°, a safety arm will automatically secure the sash. Press the 'release' button gently when you want to close the rooflight.

Maintenance

The pane should be cleaned with a soft, clean, lint-free cloth or non-abrasive sponge. The rest of the window can be cleaned with ordinary household cleaners.

Guarantee

- 10 year VELUX guarantee on windows and flashing kits.
